

Metz Environmental Services (MES) Client Partner Coronavirus (COVID-19) Policy Update

Supply Chain

- MES's procurement team has been monitoring and continues to monitor all critical supply chain sources
- Any major disruptions will be communicated immediately
- MES will increase inventory par levels **AT THE DISCRETION OF THE CLIENT PARTNER**
- Our on-site teams have been advised NOT to stockpile any products unnecessarily unless advised to do so by MES corporate and/or our Client Partner

Team Members

- We have implemented a revalidation process of all MES managed team members which includes:
 - Proper hand washing procedures
 - Standard Precautions
 - Infection Control
- Team members are being advised to stay home if sick
- Any team member who has travelled to a CDC Level-3 country OR has been on a cruise ship is required to be tested for COVID-19 and produce the appropriate results OR remain out of work (quarantine) for a period of not less than 14 days
- We have restricted air travel for our regional management
- Team member access to all facilities serviced by MES will follow the Client Facility's directive and policy

Service Model

- MES service model encourages Standard Precautions be used at all times, in all industries, as well as hospital grade disinfectants be used for all high touch areas. Frequencies of disinfection of high touch surfaces have been increased to at least daily, more often in cases. **AT THE DISCRETION OF THE CLIENT PARTNER**, MES can support your efforts by:
 - Modifying hours of operation or levels of coverage.
 - Providing, participating in and/or conducting facility specific training programs.
